

COLLABORATION SCREENS

Rumba™ COLLABORATION SCREENS

Ignite workspace rhythm with the Rumba™ Collaboration Screens! These screens provide a flawless ensemble in any conference area, training room, meeting space or anywhere a little collaboration may be needed. Create a space to brainstorm, hold team meetings or meet with guests or clients. Make collaboration music with three screen configurations, in four different sizes. Never miss a beat with the magnetic whiteboard screen, or add intriguing design elements with the perforated steel or fluted polycarbonate screens. Use the whiteboard to write down ideas, notes or reminders to ensure everyone is in step. For even more melodic movements, incorporate a combination of materials, same on both sides, with two styles to choose from! But the music doesn't stop there! All the screens easily move on four casters, (2 locking), for placement anywhere so collaboration is even easier. Add the ganging connector set to connect the screens and create a variety of spaces to suit different environments. It's workspace harmony that should be noted, because it will have everyone singing a new tune!

Rumba™

COLLABORATION SCREENS
