Make your LIGHT CHOICE the RIGHT CHOICE.

Deeper Cleaning –
*30% better than the current #1 selling
lightweight!*

Better Durability –
*Constructed with high-strength
lightweight magnesium*

Weighs only 10 lbs. –
For easy mobility

Incredible DuraLite features:

- 1 Soft Grip Handle for comfort.
- 2 Quick-change Power Cord eliminates downtime.
- 3 **Exclusive** Widest Air Path of any lightweight for clog- resistant, worry-free operation.
- 4 Easy-access Dual-zipper Bag simplifies emptying.
- 5 **Exclusive** Magnesium Dual-support Handle Socket and Bag Assembly for exceptional durability.
- 6 **Exclusive** Positive-lock, wear-resistant Magnesium Handle Release.
- 7 Large, easy-rolling Rubber Encased Wheels for superior maneuverability.
- 8 **Exclusive** Tough Magnesium Sole Plate removes without tools for fast and simple belt change.
- 9 Energy Efficient 5-amp Motor with specially designed “pancake-style” moves more air at less RPM’s for longer motor life.
- 10 Dual-Edge Cleaning for easy coverage along baseboards.
- 11 Lies flat for low clearance areas.

CRI Approved

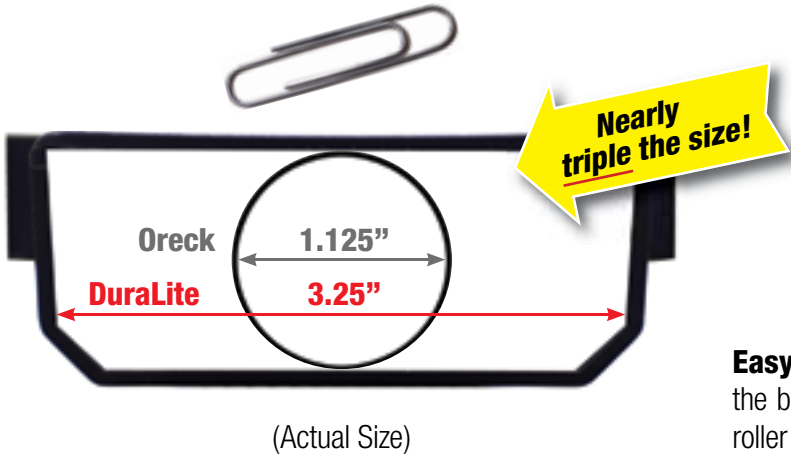

Sanitaire lost the weight... but we kept the clean.

By utilizing high-strength magnesium, Sanitaire was able to incorporate components that are 75% lighter than steel and 33% lighter than aluminum, all with better anti-corrosion and mechanical properties. Plus, unlike the plastic found in many competing machines, Sanitaire's magnesium components

are much stronger, stiffer and better able to endure impact and harsh handling. And, for the deep-down clean you've come to expect from every Sanitaire model, the incredible DuraLite also uses a more powerful, true commercial-grade motor and the widest air path of any lightweight on the market.

Exclusive Extra-large, Clog-resistant Air-path is nearly three times bigger than our nearest competitor. We easily have one of the biggest air paths of any lightweight on the market. The bigger the air path, the easier dirt and debris can be transported, and less of a strain is put on the motor.

Easy to Remove Bottom Plate requires no tools. Changing the belt is as simple as opening a latch and popping out the roller brush.

Quick-change Power Cord for simple, on-site maintenance greatly minimizes downtime.

Easy-access Dual-zipper Bag makes emptying a snap increasing productivity.

▲ **Large Easy-roll Wheels** with rubber over-mold protects hard surfaces and improves mobility.

◀ **Exclusive Magnesium components** are lighter than steel or aluminum and are exceptionally durable.
