

Personal/Professional Use

The ICR-1000 is the ideal digital recorder for doctors, lawyers, or other professionals who have the need to edit files. Editing functions include "overwrite" and "insert" to maximize personal dictation, and with the 4-position slide control, it is extremely comfortable to operate.

The ICR-1000 is designed to feel and operate like an analogue recorder with all the benefits of digital; including: extended recording times and superior recording quality - and no tapes or moving parts mean long-term performance. So, Go Digital with Sanyo Digital Voice Recorders.
