

Infrared Counterfeit Detector

New advanced counterfeit detection device. Offers fast, reliable detection of both paper and new polymer bank notes.

HIGHLIGHTS

- **Infrared Counterfeit Detection** An infrared camera detects the photosensitive inks and anti-counterfeit design patterns not visible to the naked eye
- **Built-In LCD display** Quickly shows you an image to check for the infrared security features.
- **Electric Operation** Protecting your money has never been so easy with low power consumption 12W electric operation

Infrared (IR) counterfeit detection is a highly reliable way to identify US & Canadian counterfeit bills.

A bill image projected onto the LCD screen of an infrared currency detector will reveal both reflective and non-reflective anti counterfeit bill features. By design, the non-reflective ink will disappear when viewed with the detector as shown in the pictures. The user compares the on-screen bill image to a currency template for particular denominations and countries of origin and is able to determine the bills authenticity in just seconds.

Bright 3.5" LCD Display. Reference label conveniently located on the front of the unit shows you the reflective ink features of Canadian currency. Non-reflective ink features will not be visible.

Hi-Tech

Secure

Easy to-use

Works with
Paper &
Polymer

RCD-410-CA

Infrared Counterfeit Detector

SPECIFICATIONS

ELECTRICAL RATING

Voltage: DC 12V / 1A

Consumption: 8W

FEATURES

Infrared Detection: Yes

Display Type: LCD

Screen Size: 3.5"

Portable: Yes

Reference Label: Yes

DIMENSIONS

Unit (W" x D" x H"):

4.4" x 3.4" x 9.5"

Unit Weight: 0.9 lbs

Unit Carton (W" x D" x H"):

5.9" x 5" x 11.3"

Unit Carton Weight: 1.4 lbs

Master Carton Quantity: 10

Master Carton (W" x D" x H"):

25.7" x 12.4" x 12"

Master Carton Weight: 15.9 lbs
