⁷ One-year limited warranty to all purchasers; toll-free support and second-year warranty require registration within 60 days of purchase.

[†] Maximum pages/copies per minute (ppm/cpm) are measured after first page with text patterns in Draft Mode on plain paper. Laser quality black and color print speeds are determined in default, single-side mode in accordance with ISO/IEC 24734. Actual print times will vary based on system configuration, software, and page complexity. See www.epson.com/printspeed for details, including complete ISO reports.

^{††} Cartridge yields are based on continuous printing of a suite of five black and color pages as required by ISO/IEC 24711 and 24712. Actual yields will vary considerably for reasons including images printed, print settings, temperature and humidity. Yields may be lower when printing infrequently or predominantly with one ink color. A variable amount of ink remains in the cartridges after the "replace cartridge" signal. Part of the ink from the first cartridges is used for priming the all-in-one. Ink is used for both printing and print head maintenance. All inks are used for both black and color printing. For more information about yields for this all-in-one, see www.epson.com/cartridgeinfo

^{†††} Ink fade resistance ratings based on accelerated testing of prints on specialty media, displayed indoors, under glass. Actual print stability will vary according to media, printed image, display conditions, light intensity, humidity and atmospheric conditions. Epson does not guarantee the longevity of prints. For maximum print life, display all prints under glass or properly store them.
